CONSOLES

A console that combines the simplicity of the contemporary design with a complex manufacturing: the 10mm thick brass structure supports the weight of the console giving stability to the whole, thus creating an original game of contrasts between lightness and stability. Enriched by decorative ropes running along the outer perimeter of the base, the console is equipped with a refined laminated and ground bronzed glass top.

Console with structure in metal with bronzed finishing. Coupled glass top (extra clear + smoky) with decorative rope. Details in bronzed finishing.
