

# Wallace

## DAY FURNITURE

Glass, brass and rosewood: an unconventional mix of refined materials for Wallace sideboard. The structure is made of rosewood and, in the edges, carved brass, while the drawers are covered with a bronzed brass foil. The double flap in glass gives access to the internal area upholstered in microfiber while the crossed base in bronzed brass continues in the upper part, all around the piece of furniture, giving stability to the whole.

Sideboard with structure in wood, metal and glass. Wood veneered in rosewood with glossy finishing and bronzed decorated profiles. Inside covered in microfibre. LED lighting.
